

GT 4.2 C Common Libraries : System Administrator's Guide

DRAFT

GT 4.2 C Common Libraries : System Administrator's Guide

Introduction

This guide contains advanced configuration information for system administrators working with C Common Libraries. It provides references to information on procedures typically performed by system administrators, including installation, configuring, deploying, and testing the installation.

Important

This information is in addition to the basic Globus Toolkit prerequisite, overview, installation, security configuration instructions in the [Installing GT 4.2.0](#). Read through this guide before continuing!
